# Flour - Denti Farine, naturalmente

Anima di Grano - Fast

Flour for pizza ideal for the preparation of direct doughs of short duration or that require leavening time of up to 8 hours. FAST flours are obtained from a careful selection of Italian and foreign grains that guarantee the consistency of the product and, with a good gluten content, make the flour extremely versatile and excellent for the preparation of Italian plate pizza, pan pizza or focaccia. Rising time: 4-8 hours.

### CHARATERISTICS

Type: 00  
Strength: W180-W210 / W210-W240 / W250-W260  
Pack size: 12.5 kg / 25 kg

Anima di Grano - Midi

Flour for pizza ideal for the preparation of doughs that require rising times between 10 and 18 hours. MIDI flours are made from selected foreign grains with a high gluten content that guarantees excellent stability and high absorption of liquids, favoring excellent extensibility. The dough after cooking is more fragrant and digestible, ideal for preparing pizza by the plate or pizza by the meter. Rising time: 10-18 hours.

### CHARATERISTICS

Type: 00  
Strength: W380 - W390  
Pack size:12.5 kg / 25 kg

Anima di Grano - Slow

Flour for pizza ideal for the preparation of doughs that require leavening times over 18 hours, SLOW flours are obtained from a careful selection of foreign grains that give the flour, through careful grinding, the high protein content essential to obtain a high extensibility and make them ideal for doughs that require long maturation times. Rising time: 18-24 hours.

### CHARATERISTICS

Type:0  
Strength: W370-W380 / W380-W400 / W400-W420  
Pack size: 12.5 kg / 25 kg

Polverina

Type '00' soft wheat flour for professional use, designed for making easy roll doughs for pizzas, pinsa, pizza alla pala and for dusting bread products. It is very fine, and guarantees optimal moisture absorption without hardening the dough, does not make dust and has excellent resistance to the high temperatures of pizza ovens. It preserves the flavour of the finished product and facilitates the processing stages.

### CHARATERISTICS

Type: 00  
Pack size: 1 kg / 5 kg

Torte e Dolci Fritti

# Anchor Instant Dry Yeast

### Product description:

- Is a natural yeast, rich in protein, iron and Vitamin B.
- Specially formulated Instant Dry Yeast in vermicelli form for **baking applications:**
- remains dormant until activated with moisture.
- Product is vacuum packed in laminated foil.
- Shelf life 24 months

### Application:

- Suitable for bakeries where refrigeration is a challenge.
- Can be transported or stored without refrigeration
- Preserves its quality for at least 24 hours
- Ensures convenience

# Gaderi

## Powder Gelatin

Edible gelatin successfully prevents whey precipitation through the formation of hydrogen bond to avoid the contraction of casein, thus preventing the solid phase from separating from the liquid phase, and improving the organizational state and stability of the finished product. Adding edible gelatin to yogurt can prevent whey separation and improve the tissue state and stability of the finished product.

## sheets Gelatin

Casein itself is a natural emulsifier and stabilizer, but casein will lose its emulsifying ability and stability in acidic environment, and gelatin can provide stable conditions for casein and play a role in protecting colloid. All milk foam can be regarded as the emulsification system of air, fat and water. Gelatin, as a hydrophilic colloid, combines with water to form a thin layer of gelatin to cover the fat ball and wrap the empty bubbles, reducing the impact of external conditions on the air pressure in the air bubbles, achieving the role of stabilizing the foam, so as to maintain a stable emulsification state

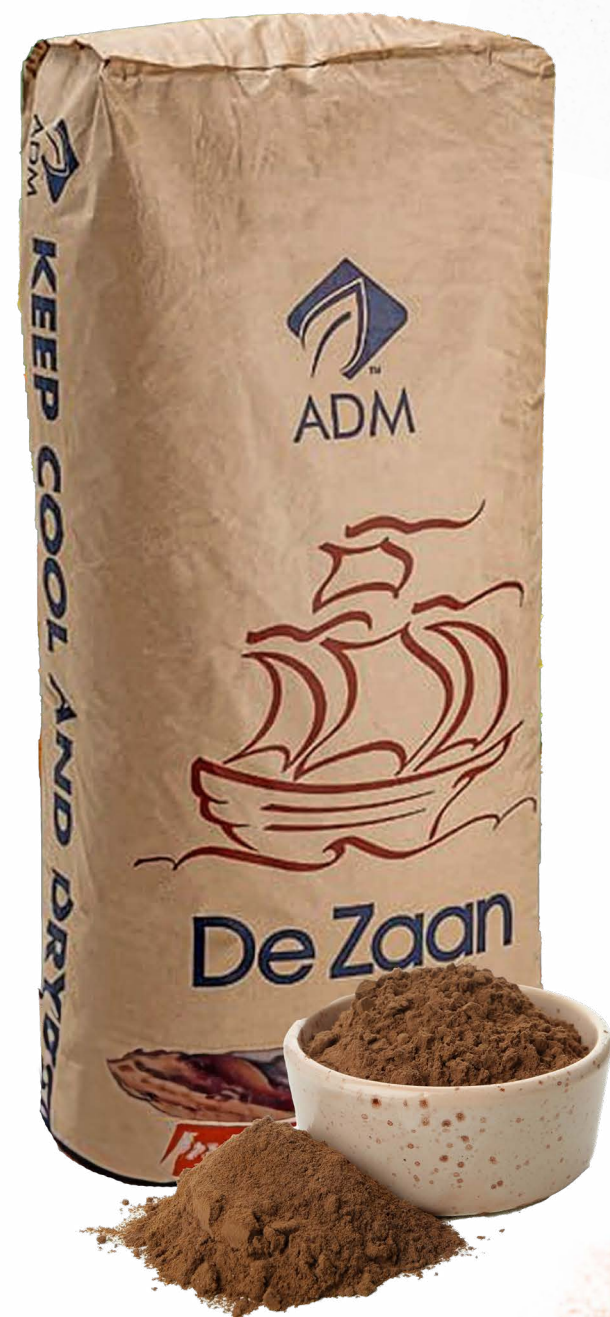

### Product details:

- Excellent flavor; you won't believe it's non-dairy!
- Most economical line for maximum volume
- Versatile for a wide array of desserts
- Add water, juices, coffee, liquors or anything else for an original one of a kind topping.
